

B+N

WE ARE WORKING FOR
A MORE LIVABLE WORLD

THE QUALITY POLICY OF THE B+N GROUP

The management of the **B+N Group** is committed to providing quality services. For this reason, it is our duty to provide regular trainings to our employees and, as part of this, we ensure that each member of our staff familiarizes himself or herself with our policy, the objectives and structure of our management system and the significance of taking part in its implementation. Our aim is to establish and operate a modern, clear-cut and efficient quality management system which is able to properly support our value-creating processes.

To ensure this, we make every effort to protect the environment and use energy and materials in an efficient manner.

We continuously improve our management systems and processes to be able to meet our partners' and customers' requirements as fully as possible.

We ensure that our services comply with the relevant international requirements, standards and the expectations of our customers and partners.

The introduction of our management systems is a key to further development and maximizing the satisfaction of our partners as well as our employees' commitment to quality.

We are convinced that we can improve our market position only by constantly increasing the efficiency of our management systems; as a result, their continuous improvement is a basic task for us.
