

B+N

WE ARE WORKING FOR
A MORE LIVABLE WORLD

THE HEALTH AND SAFETY AT WORK POLICY OF THE B+N GROUP

The B+N Group is committed to ensuring the health and safety of its employees as well as its guests and partners arriving at its service units.

For this reason, we have established our ISO 45001:2018 Health and Safety at Work management system.

This method applies to all the activities and organizational units of the B+N Group. Our aim is to protect and ensure the health and safety of our workers, employees, visitors and partners.

The risks arising from our activities are assessed through risk assessment processes, identifying all the threats that may have an impact on safety at work.

We organize trainings for our employees to call their attention to the threats and risks identified and direct their focus to the importance of prevention as well as compliance with the rules on safety at work.

The rules to be observed are arranged in work instructions and we perform scheduled reviews on the proper use of the system.
